Amy,

I'll also look to see if I have Steve's comments.

Now that we have survived the end of the fiscal year and the shutdown, I thought I would remind you that we had sent this Passaic River draft Proposed Plan for your review.

We received comments from Steve Ells, but assume that you have additional advice to give?

**Subject:** Draft Proposed Plan for your review

Ray Basso asked me to send you the attached DRAFT Proposed Plan for your review. It is for the Lower Eight Miles of the Lower Passaic River Focused Feasibility Study (FFS). Please contact him with any questions, or have your staff call me at 212-637-4427.

Note that the attached file only has the text of the Proposed Plan. If you need the figures and tables, please let me know and I will send a separate file next week. Also, I'm sure Ray explained this in his previous e-mail, but this is an early draft that still contains some blanks where data have to be updated and new model results filled in. The purpose of the review was for you to get an early look at how we are addressing certain major issues. Finally, this draft is not in the final Region2 format for Proposed Plans, but in normal Word format for ease of review and editing.

This document is still in the DRAFT phase, so it should not be shared outside of EPA.
